KANDA PUTRA HIBATULLAH

Software Engineer | Fullstack Developer

Matraman, East Jakarta • +62 821-2917-8771 • kandaputrah@gmail.com

Portfolio: kandaputra.my.id • LinkedIn: linkedin.com/in/kanda-putra-hibatullah-96a032241

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and deploying **production web applications** across healthcare, waste management, and SaaS. Experienced in **end-to-end development** using **Next.js, TypeScript, Node.js, and PostgreSQL**, with ownership spanning **frontend, backend, database, and cloud deployment**.

EXPERIENCE

Founder & Lead Developer | Kyuverse (kyuverse.my.id)

Self-Founded • 2025 – Present

- Building a SaaS platform that provides financial planning, budgeting, and operational tools for artists, cosplayers, and photographers in the J-culture ecosystem.
- **Architected and developed the full-stack SaaS platform end-to-end** using Next.js, React, TypeScript, Drizzle ORM, and PostgreSQL, covering frontend architecture, business logic, and database integration.
- Implemented performance optimization, SEO, and Core Web Vitals improvements to enhance application performance and discoverability.
- Managing continuous development and production deployment through Vercel and Git-based CI/CD workflows.

Fullstack Software Engineer (Freelance) | ParongpongrawLab x Anambas Foundation (anambas.my.id)

Oct 2025 – Present • Digital Waste Ecosystem Platform

- **Developed and deployed** a full-stack digital waste management platform supporting **800+ customers across 11 waste banks** in Anambas.
- **Architected and developed the platform end-to-end** using **Next.js, TypeScript, React, Prisma, and Supabase (PostgreSQL)**, covering frontend, backend business logic, database integration, and real-time data synchronization
- Engineered **waste inventory and circular financial tracking**, managing **15,000+ kg of recorded waste** and associated customer transactions.
- Built centralized dashboards for **waste collection, inventory, customer balances, transactions, and financial operations** across participating community-based organizations (CBOs).
- **Maintained and continuously improved the production system**, handling feature development, bug fixes, performance optimization, and operational requirements during its phased rollout.

Fullstack Software Engineer Intern | RS St.Carolus Jakarta

Sep 2025 – Dec 2025 • Nursing Re-credentialing & Competency Verification Platform

- **Architected and developed** a full-stack nursing re-credentialing platform supporting **400+ nursing staff**, covering credential verification and competency assessment workflows.
- Built **role-based dashboards and workflows** for nurses, unit heads, and assessors, covering document verification, examinations, competency assessments, certificates, and compliance records.
- Developed backend services using **Node.js, Express, PostgreSQL, and Sequelize**, implementing authentication, data management, document handling, and assessment workflows.
- Migrated manual credential records into a **structured digital system** and deployed the application on the hospital's internal Windows Server.
- Implemented **SSO authentication, JWT-based authorization, PDF report generation, and Excel/CSV data processing** for operational and compliance workflows.
- **Deployed and supported the production system**, replacing manual credential management with a centralized digital workflow.

Fullstack Software Engineer (Freelance) | Rantai Biru (rantaibiru.com)
Oct 2025 – Jan 2026 • Real-Time Waste Tracking & Supply Chain Platform

- Developed a digital waste tracking and supply chain platform using Next.js, React, Node.js, Express, MySQL, and Sequelize.
- Built an interactive questionnaire system with client-side scoring logic and automated WhatsApp integration for delivering assessment results.
- Developed a real-time inventory dashboard with Zustand and API/webhook integrations, providing operational visibility for field teams.
- Implemented backend authentication and API infrastructure using JWT, bcrypt, CORS, and Express, with Docker for deployment and environment consistency.

Frontend Software Engineer (freelance) | Selected Client Projects
2025 – 2026 •
Smartlansia — Elderly Health Monitoring & Cognitive Therapy (smartlansia.web.id)
Stimuno — Interactive Health Education (stimuno.web.id)
Sirindu — Sleep Health Screening (sirindu.com)

- Delivered **three production-ready frontend applications** for healthcare and organizational clients, typically completing initial development within **3–7 days** per project.
- Developed responsive interfaces and interactive client-side features using **Next.js, React, JavaScript, and modern UI libraries**.
- Implemented **application logic, data visualization, document viewing, and interactive assessment workflows** based on client requirements.
- Collaborated directly with clients to **iterate on requirements, implement revisions, and deliver production-ready interfaces**.

ADDITIONAL EXPERIENCE

Google Cloud Facilitator | Google Cloud
August 2025 -Sep 2025; July 2026 - Present

- Facilitated Google Skills Arcade, guiding **20+ participants** through cloud computing, AI, and machine learning modules while providing **technical mentorship** throughout the program.

TECHNICAL SKILLS

Languages	**:** TypeScript, JavaScript, SQL, Python, SQL
Frontend	**:** Next.js, React, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design, Web Accessibility
Backend	**:** Node.js, Express.js, REST APIs, API Routes, Authentication & Authorization
Database & ORM	**:** PostgreSQL, MySQL, Prisma, Drizzle ORM, Sequelize
Cloud & DevOps	**:** Docker, GCP (Google Cloud Platform), AWS, Vercel, Git/GitHub, CI/CD
Integration	**:** Zustand, Context API, Webhooks, WhatsApp API, Real-time Data Synchronization

EDUCATION

Bachelor of Software Engineering | Universitas Bina Sarana Informatika
GPA: 3.89 / 4.00 • 2022 – Graduated 2026
Thesis: Development of a Progressive Web Application (PWA) Based Waste Bank Information System at Anambas Foundation.

CERTIFICATIONS

- Google Cloud Architect & Google Cloud Engineer – Dicoding
- DevOps Fundamentals & Cloud – Dicoding.
- Cloud Gen AI AWS – Dicoding
- React Web Development & Git/GitHub – Dicoding
- PCAP: Programming Essentials in Python — Cisco
