KANDA PUTRA HIBATULLAH

Software Engineer | Cloud Specialist | Fullstack Developer

Matraman, East Jakarta • +62 821-2917-8771 • kandaputrah@gmail.com

Portfolio: kandaputra.my.id • LinkedIn: linkedin.com/in/kanda-putra-hibatullah-96a032241

PROFESSIONAL SUMMARY

Fullstack Software Engineer specializing in scalable web applications and cloud infrastructure. Recently graduated with Bachelor's degree in Software Engineering. Experienced in building end-to-end applications with Next.js, TypeScript, Node.js, and PostgreSQL. Proven track record of delivering production-grade solutions for healthcare, elderly care, and waste management systems. Strong proficiency in backend APIs, frontend state management, DevOps practices (Docker), and real-time data integrationt.

EXPERIENCE

Founder & Lead Developer | Kyuverse (kyuverse.my.id)

Self-Founded • 2025 – Present

- Building Kyuverse SaaS platform with creator tools (budget calculators, portfolio showcase, convention planning resources) for artists, cosplayers, and photographers in the J-culture ecosystem..
- Architected full-stack platform using Next.js, React, TypeScript, Tailwind CSS with PostgreSQL.
- Optimized frontend performance, SEO implementation, and Core Web Vitals for discovery and user retention.
- Deployed on Vercel with continuous integration managing ongoing feature development, performance optimization, and product scaling

Freelance Fullstack Developer | ParongpongrawLab & Anambas Foundation

Oct 2025 – Present • Digital Waste Ecosystem Platform

- Developed comprehensive digital waste management ecosystem platform integrating admin dashboards with collector networks for transparent waste supply chains.
- Built full-stack using Next.js, React, TypeScript with Supabase (PostgreSQL) backend for scalable waste bank operations.
- Engineered real-time inventory tracking and balance ledger system with webhook integrations for live visibility across collection teams in Anambas
- Implemented waste tracking, inventory management, and financial ledger features; designed responsive UI with Tailwind CSS.
- Deployed production system supporting community-based organizations managing waste banking operations.

Freelance Fullstack Developer | Rantai Biru (rantaibiru.com)

Oct 2025 – Jan 2026 • Real-Time Waste Tracking & Supply Chain Platform

- Developed Rantai Biru, a digital waste tracking and transparent supply chain platform for sustainable waste management
- Built interactive questionnaire system with client-side scoring logic and automated WhatsApp integration to deliver assessment results to users.
- Built real-time inventory dashboard with Zustand state management and webhook integrations providing live visibility
- Deployed production system using Docker containerization ensuring consistent environments; provided technical support and performance optimization for field operations teams

Freelance Web Developer | Smartlansia (smartlansia.web.id)

Apr 2026 • Elderly Health Monitoring Platform

- Developed Smartlansia, a comprehensive elderly health platform enabling self-assessment of physical, psychological, and sexual health.
- Built interactive questionnaire system with client-side scoring logic and automated WhatsApp integration to deliver assessment results to users.
- Implemented accessibility-first design with elderly-focused UX: large fonts, high-contrast colors, simplified navigation, mobile optimization.
- Engineered frontend using Next.js, React, TypeScript with Tailwind CSS; integrated WhatsApp API for result delivery.
- Deployed production system with WCAG accessibility compliance; platform actively used by real elderly users for health monitoring

Freelance Web Developer | STIMUNO (stimuno.web.id)
Mar 2026 – Apr 2026 • Cognitive Stimulation & Therapy Platform

- Developed STIMUNO, an evidence-based cognitive stimulation, group therapy, and functional fitness platform for elderly users.
- Built interactive cognitive assessment questionnaires with client-side scoring algorithms and automated WhatsApp notifications for therapy recommendations.
- Implemented frontend using Next.js, React with responsive Tailwind CSS design; integrated WhatsApp API for assessment delivery.
- Designed accessible UI with elderly-focused UX ensuring ease of navigation and engagement for cognitive health assessments.
  Deployed production system actively delivering cognitive assessments and therapy guidance to real elderly users.

Freelance Web Developer | sirindu.com
Oct 2025 • Sleep Health Screening Platform

- Developed high-performance health-tech platform for non-pharmacological sleep therapy assessment using Next.js.
- Built interactive sleep disorder screening questionnaire with client-side logic flow and automated WhatsApp delivery of assessment results.
- Implemented responsive accessible UI optimized for elderly users with large fonts, high contrast, and mobile-first design.
- Deployed production system with WhatsApp API integration for assessment delivery and user inquiry handling.
- Optimized Core Web Vitals achieving fast page load performance and WCAG accessibility compliance.

Fullstack Engineer Intern | RS St.Carolus Jakarta
Oct 2025 • Sleep Health Screening Platform

- Architected and developed full-stack nursing re-credentialing platform automating competency verification for 400+ hospital nurses
- Built responsive Next.js frontend with React components and SQL Server backend for credential verification workflows.
- Engineered backend using Node.js and Express handling nurse data management, document verification, and compliance reporting.
- Managed database infrastructure migration from manual records to structured digital system; handled deployment on hospital internal Windows Server
- Deployed production system with WhatsApp API integration for assessment delivery and user inquiry handling.
- Delivered production system supporting hospital nursing operations and regulatory compliance; actively used for managing credentials of 400+ nursing staff.

Personal Project | Rilyverse (rilyverse.my.id)
Nov 2025

- Personal portfolio project exploring creative platform architecture and artist digital presence solutions.
- Built with Next.js and React demonstrating frontend architecture patterns and creative showcase design.

Google Cloud Facilitator | Google Cloud
Nov 2025

- Facilitated Google Skills Arcade self-paced learning program guiding 20+ participants through cloud computing, AI, and machine learning modules.
- Provided technical mentorship helping learners progress through curriculum independently.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, Python, SQL

Frontend: Next.js, React.js, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design, Web Accessibility (WCAG).

Backend: Node.js, Express.js, REST APIs, Next.js API Routes, API Security & Authentication.

Database: PostgreSQL (schema design, optimization, indexing), MySQL, SQL Server, Supabase

DevOps & Cloud: Docker, Google Cloud Platform (GCP), Vercel, Git/GitHub, CI/CD workflows

State Management: Zustand, Context API, Redux patterns.

Integration & Automation: Webhooks, WhatsApp API integration, RESTful API integration, Real-time data synchronization.

Specializations: SaaS architecture, Full-stack development, Real-time systems, Accessibility-first design, Database optimization, Production deployment & support.

EDUCATION

Bachelor of Software Engineering | Universitas Bina Sarana Informatika
GPA: 3.89 / 4.00 • 2022 – Graduated 2026

Thesis: Development of a Progressive Web Application (PWA) Based Waste Bank Information System at Anambas Foundation.

CERTIFICATIONS

- DevOps Fundamentals & Cloud (AWS Gen AI) – Dicoding
- Cloud Gen AI AWS – Dicoding.
- Google Cloud Architect & Google Cloud Engineer – Dicoding
- Prompt Engineering for Software Developers & AI Applications – Dicoding
- React Web Development & Git/GitHub – Dicoding
- PCAP: Programming Essentials in Python – Cisco

ORGANIZATIONS

Coordinator, Research & Development Division | Software Engineering Student Organization
Jan 2024 – Jan 2025

- Led research initiatives and organized development workshops for the software engineering student community.
- Mentored junior developers on modern web development practices, architecture patterns, and production deployment.
